(case or casing or housing) near (openings or slots or s

- | Title | Pub. Date | Int. Class | Applicant |
|--|------------|-------------|---------------------------------------|
| 1. (WO 2006/079537) OPTICAL ASSEMBLY | 03.08.2006 | G02B 7/00 | CARL ZEISS SMT AG |
| <p>Optical assembly supported in an arrangement, especially in an objective (1, 8) or in an illuminating or exposure system, in the interior of a housing comprising at least one optical element, especially a lens (34, 35), a mirror, or an aperture (9), wherein the at least one element is influenceable by at least one manipulator and wherein (i) the at least one manipulator (10, 22, 25) is arranged either outside of the housing or in a holding means that is separated entirely or to a large extent by the help of a decoupling means, and that there is provided an effective coupling between the manipulator (10, 22, 25) and the element to be influenced by the manipulator (10, 22, 25) in the interior of the arrangement, (ii) the manipulator comprises...</p> | | | |
| 2. (WO 2006/077527) ELECTRONICALLY CONTROLLED CAPSULE FOR RELEASING RADIATION | 27.07.2006 | A61N 5/10 | KONINKLIJKE PHILIPS ELECTRONICS, N.V. |
| <p>A method and system (2100) are provided for dispensing radiation to a patient from a location internal to the patient. The system (2100) includes a radioactive assembly (2106) having a radioactive material (2107); a first radiation resistant assembly (2102) having at least one first radiation resistant panel (2116), wherein at least one gap (2122) is formed in the first radiation resistant assembly (2102) for allowing radiation to pass there through to the ambient environment of the capsule; an actuator; and a second radiation resistant assembly (2104) having at least one movable second radiation resistant panel (2136) operationally coupled to the actuator for controllably moving the second radiation resistant assembly (2104) for positionin...</p> | | | |
| 3. (WO 2006/076302) SYSTEM AND METHOD FOR CREATING A SURFACE PATTERN | 20.07.2006 | H01L 21/302 | BIOFORCE NANOSCIENCES |
| <p>Some embodiments of the disclosed surface patterning systems and methods utilize a surface patterning tool coupled to a support and adapted to deposit material onto a substrate, a controller, and first, second, and third actuators electrically coupled to and controlled by the controller. In some embodiments, the first, second, and third actuators are operable to move the substrate in X, Y, and Z directions, respectively, with respect to the surface patterning tool, wherein the substrate is movable by the first, second, and third actuators to different positions with respect to the surface patterning tool, and wherein material is transferable from the surface patterning tool to the substrate in each of the different positions to define the d...</p> | | | |
| 4. (WO 2006/059098) SUSPENSION SYSTEM | 08.06.2006 | F16F 3/02 | 1... LIMITED |
| <p>A suspension system suspends an object allowing movement of the object along a movement axis. The suspension system comprises two resilient members each suspending the object from a central point. The resilient members are integrally formed and are curved around the object as viewed from a direction along the movement axis. A support structure holds the resilient members in a flexed state with the portions of the resilient members on each side of their central points having opposite curvature as viewed from a direction perpendicular to the movement axis.</p> | | | |
| 5. (WO 2006/034141) FLUID HANDLING IN DROPLET DEPOSITION SYSTEMS | 30.03.2006 | B41J 2/01 | FUJIFILM DIMATIX, INC. |
| <p>In general, in a first aspect, the invention features a droplet deposition system (100), including a jetting assembly (112) comprising one or more modules (105-108) capable of ejecting droplets (111), a plurality of conduits (145-148, 155-158) in fluid communication with the jetting assembly (112), and a valve (101) coupled to the conduits (145-148, 155-158) and adjustable between a first state in which fluid flow through the conduits (145-148, 155-158) is substantially</p> | | | |

RESULT LIST
